Transform your interiors into striking, stylish spaces

Aqua Wall is an exclusive collection of waterproof wall panels that blend luxurious design with effortless installation and a practical, low-maintenance finish.

Crafted from high-quality Stone Polymer Composite (SPC), Aqua Wall panels are fully waterproof and offer a range of advantages over other types of wall panel:

-  100% waterproof
-  Lightweight and easy to install
-  ClickSeal™ locking system

Lightweight and easy to fit, Aqua Wall panels feature ClickSeal™ technology to deliver a seamless finish, with no need for trims between panels, except at corners. Unlike traditional wall tiles, there's no need for grout, making installation a breeze.

The best part about Aqua Wall?

The stunning range of designs! From subtle matt stone effects to bold high-gloss marble finishes, there's a style to suit every space. Give your walls wow factor and create the look of natural materials without the hassle of costly installation and maintenance. Whether you're planning a full bathroom renovation or a quick revamp, the beauty and simplicity of our waterproof wall panels makes them the ideal choice for any project.

With Aqua Wall, you can transform your interiors into striking, stylish spaces you'll love to spend time in.

About us

Aqua Wall is brought to you exclusively by Verona - the UK's leading distributor of tiles and flooring. With 25 years of experience in the wall and floor coverings industry, we are experts in creating stylish, durable products that offer both a practical finish and beautiful aesthetic. Our vision is to continually evolve our product offering, delivering stylish, innovative ranges that never compromise on quality, supported by an excellent level of service and customer support.

Whilst our waterproof panels are an excellent alternative to tiles, we also believe that our wall panels, tiles and luxury vinyl flooring can be combined to reflect your own unique sense of style. Throughout this brochure, you will see tiles and flooring that have been carefully selected to co-ordinate with the Aqua Wall designs, all of which are available from Verona. Browse our tile and flooring ranges at www.veronagroup.co.uk and be inspired.

Aqua Wall is available to buy from our network of independent retailers nationwide. Visit us online at www.aqua-wall.co.uk for useful information, including help finding your nearest retailer, installation guides and our handy visualiser tool, InSitu.

The Aqua Wall Collection

All Aqua Wall panels come in a versatile 2400 x 950mm size and lightweight yet durable 6mm thickness. Panels can easily be cut to size to fit your space – see page 35 for more details.

Each panel covers 2.28m².

Most designs have three faces and you will receive a random mixture of these if you order more than one box.

Visualise Aqua Wall in your own room with **INSITU**.

Having doubts about which Aqua Wall panels suit your interior the best?

Thanks to our online visualiser, InSitu, you can preview our ranges in your own home to help you make the right choice.

The Aqua Wall Trims

Aqua Wall's innovative ClickSeal™ technology eliminates the need for trims between panels on the same wall, creating a seamless finish. Trims are used on edges and corners to ensure a clean, professional result.

We offer a range of aluminium trims, in colours to suit all designs, which can be easily cut to size to fit your space. See page 35 for details of installation.

End trim

Used to create a neat finish where vertical edges are exposed at the end of a panel. Can also be used horizontally at the top and bottom of panels to provide a neat, watertight finish.

Inner corner trim

Use these where two panels join internally at a right angle. Install the first panel, then add the trim when installing the adjoining panel as shown in the diagram.

Outer corner trim

Also used where two panels join at a right angle, but on outer corners. The trim should be installed with the first panel as shown.

| TRIM TYPE | TRIM COLOUR & PRODUCT CODE | | | |
|--|--|--|---|--|
| | Chrome | Brushed Brass | Black | White |
| Aluminium end trim 2400 x 17mm | A11030  | A11042  | A11036  | A11039  |
| Aluminium inner corner trim 2400 x 19mm | A11032  | A11044  | A11038  | A11041  |
| Aluminium outer corner trim 2400 x 20mm | A11031  | A11043  | A11037  | A11040  |

Please note: the tongue of the ClickSeal™ locking system should be removed where it is being installed into a trim. Always apply a bead of silicone within the trim during installation to ensure a watertight seal.

01. Aqua Wall Elbrus | Chrome trim
02. Aqua Wall Fuji | Brushed Brass trim
03. Aqua Wall Corinthia Matt | White trim

The product at a glance

Crafted from high quality, lightweight Stone Polymer Composite (SPC), Aqua Wall panels offer superior durability, style and ease of installation and maintenance.

ClickSeal™ technology.

Our unique ClickSeal™ locking profile delivers a seamless finish, with no need for trims between panels, except at corners.

Durable SPC core.

The Stone Polymer Composite core is durable, lightweight and fully waterproof.

Gloss film.

Our gloss panels have an additional layer to give a high-shine finish.

Colour film.

Printed in high definition to give a realistic and authentic look. Matt panels also have a UV treatment for extra durability.

Aqua Wall Installation

Aqua Wall panels have been specially designed to enable straightforward installation, thanks to the lightweight SPC core and ClickSeal™ locking system. With just a few simple tools and a good quality adhesive and silicone, you will be able to transform your room in no time. Careful preparation is the key to a stress-free installation, so take time to check your walls, plan your cuts and ensure you're happy with the layout of the panels before fixing anything to the wall.

Please scan the QR code above to download our full installation guide or watch our handy video. Each box of Aqua Wall panels is also supplied with a printed copy of the installation instructions, so please read these fully before beginning your project. Adherence to the installation instructions is critical for a safe, efficient and warranted installation. If you've got any questions, please feel free to contact our helpful Customer Support team on 0113 244 4984.

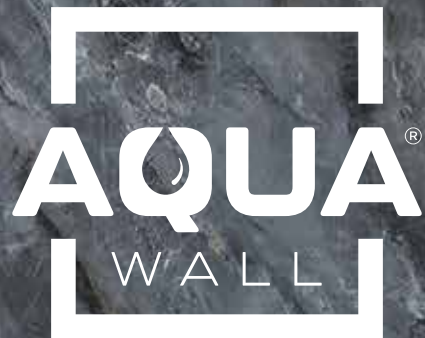

Example Installation

- 1 Aqua Wall panel
- 2 Outer corner trim
- 3 Inner corner trim
- 4 End trim

20 Year Warranty: Aqua Wall panels are supplied with a 20-year structural guarantee, warranting that the structural integrity of the product will not fail under normal conditions within 20 years from the date of purchase. Prior to installation, all panels must be carefully inspected for defects, colour variation, or surface imperfections; once installed, panels are deemed to be accepted and no claims will be accepted for visible defects that should reasonably have been identified before fixing. As installation details, structural design, and environmental conditions are beyond the Company's control, no responsibility can be accepted for improper installation or for care and maintenance after installation. In the event of a latent defect caused by improper manufacturing, the Company will replace the defective product, provided written notification is received and the cost of replacement is pre-approved by the Company in writing prior to the commencement of any warranty work. The Company will not be responsible for panels installed with visible defects. Aqua Wall panels are manufactured to strict tolerances; however, slight variations in colour, texture, pattern, finish, or minor surface imperfections (including micro-spots, fine lines, or subtle surface finish marks) are inherent in the manufacturing process, do not constitute defects, and do not affect performance. Variations in colour, shading, and texture may also occur between different production batches of SPC panels, and customers are therefore advised to purchase sufficient packs in a single order to complete their project.
